## DETAILED ACTION

### *Interference*

Claims 41-58 and 60-63 are rejected under 35 U.S.C. 135(b) as being made more than one year from the date on which U.S. Patent No. 5,792,603 (Huddart et al.) was granted. See *In re McGrew*, 120 F.3d 1236, 1238, 43 USPQ2d 1632,1635 (Fed. Cir. 1997) where the Court held that the application of 35 U.S.C. 135(b) is not limited to *inter partes* interference proceedings, but may be used as a basis for *ex parte* rejections. In addition, 35 U.S.C. 135(b) discloses that if the application for interference was not filed until more than one year after the issuance of the patent, an interference will not be declared unless at least one of the claims which were in the application, or in the parent application, prior to expiration of the one year period was for “substantially the same subject matter” as at least one of the claims of the patent. In the instant application the claims were copied after the one-year issue date of U.S. Patent 5,792,603, thus applicant is basing the claim of interference on the parent application 08/625,398, for which a continuation was filed on April 5, 1999. The claims of application 08/625,398 have been reviewed and it does not appear that applicant has a claim for “substantially the same subject matter” as at least one of the patented claims prior to the expiration of the one-year period. Hence applicant is required to explain how the requirement of “substantially the same subject matter” is met by the parent application (08/625,398).
